Notes to the financial statements

These notes form an integral part of the financial statements.

1. Domicile and activities

Del Monte Pacific Limited (the “Company”) was incorporated in the British Virgin Islands on 27 May 1999 under the International Business Companies Ordinance, Chapter 291 of the laws of the British Virgin Islands, as an international business company. On 2 August 1999, the Company was admitted to the Official List of the Singapore Exchange Securities Trading Limited (“SGX-ST”). The registered office of the Company is located at Craigmuir Chambers, Road Town, Tortola, British Virgin Islands.

The principal activity of the Company is that of investment holding. Its subsidiaries are principally engaged in growing, processing, and selling canned and fresh pineapples, pineapple concentrate, tropical mixed fruit, tomato-based products, and certain other food products mainly under the brand names of “Del Monte” and “S&W”. The details of the Company’s subsidiaries and their principal activities are set out in note 5.

The financial statements relate to the Company and its subsidiaries (together referred to as the “Group”) and the Group’s interests in joint ventures.

A subsidiary is considered significant as defined under the SGX-ST Listing Manual if its net tangible assets represent 20% or more of the Group’s consolidated net tangible assets, or if its pre-tax profits account for 20% or more of the Group’s consolidated pre-tax profits.

2. Basis of preparation

2.1 Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS).

2.2 Basis of measurement

These condensed interim financial statements have been prepared in accordance with International Accounting Standard (IAS) 34 *Interim Financial Reporting*. Selected explanatory

notes are included to explain events and transactions that are significant to an understanding of the changes in financial position and performance of the Group since the last annual consolidated financial statements as at and for the year ended 31 December 2012. These condensed interim financial statements do not include all the information required for full annual financial statements prepared in accordance with International Financial Reporting Standards.

These financial statements are presented in United States (US) dollars, which is the Company's functional currency. All financial information presented in US dollars has been rounded to the nearest thousand, unless otherwise stated.

3. Significant accounting policies

Except as described below, the accounting policies applied by the Group in these condensed interim financial statements are the same as those applied by the Group in its consolidated financial statements as at and for the year ended 31 December 2012.

New standards and interpretations

The Group has adopted the following IFRS from 1 January 2013 and accordingly, changed its accounting policies in the following areas:

- Presentation of Items of Other Comprehensive Income (*Amendments to IAS 1, Presentation of Financial Statements*). The amendments: (a) require that an entity presents separately the items of other comprehensive income that would be reclassified to profit or loss in the future, if certain conditions are met, from those that would never be reclassified to profit or loss; (b) do not change the existing option to present profit or loss and other comprehensive income in two statements; and (c) change the title of the consolidated statement of comprehensive income to consolidated statement of profit or loss and other comprehensive income. However, an entity is still allowed to use other titles. The amendments do not address which items are presented in other comprehensive income or which items need to be reclassified. The adoption of the amendments is required for annual periods beginning on or after 1 January 2013.
- Disclosures: Offsetting Financial Assets and Financial Liabilities (*Amendments to IFRS 7*). These amendments include minimum disclosure requirements related to financial assets and financial liabilities that are: (a) offset in the consolidated statements of financial position; or (b) subject to enforceable master netting arrangements or similar agreements. They include a tabular reconciliation of gross and net amounts of financial assets and financial liabilities, separately showing amounts offset and not offset in the consolidated statements of financial position. The adoption of the amendments is required to be retrospectively applied for annual periods beginning on or after 1 January 2013.
- IFRS 10, *Consolidated Financial Statements*, introduces a new approach to determining which investees should be consolidated and provides a single model to be applied in the control analysis for all investees. An investor controls an investee when: (a) it is exposed or has rights to variable returns from its involvement with that investee; (b) it has the ability to affect those returns through its power over that investee; and (c) there is a link between power and returns. Control is reassessed as facts and circumstances change. IFRS 10 supersedes IAS 27 (2008), *Consolidated and Separate Financial Statements*, and International Interpretation Standards

Interpretation Committee (SIC) 12, *Consolidation - Special Purpose Entities*. The adoption of the new standard is required for annual periods beginning on or after 1 January 2013.

- IFRS 11, *Joint Arrangements*, focuses on the rights and obligations of joint arrangements, rather than the legal form (as is currently the case). The new standard: (a) distinguishes joint arrangements between joint operations and joint ventures; and (b) eliminates the option of using the equity method or proportionate consolidation for jointly controlled entities that are now called joint ventures as it always requires the use of equity method. IFRS 11 supersedes IAS 31, *Interests in Joint Ventures*, and International Interpretation SIC 13, *Jointly Controlled Entities - Non-monetary Contributions by Venturers*. The adoption of the new standard is required for annual periods beginning on or after 1 January 2013. The standard has no impact on the Group's financial position and performance since the only jointly controlled entity, i.e. Field Fresh Foods Private Limited is already accounted for under the equity method.

IFRS 12, *Disclosure of Interests in Other Entities*, contains the disclosure requirements for entities that have interests in subsidiaries, joint arrangements (i.e., joint operations or joint ventures), associates and/or unconsolidated structured entities. The new standard provides information that enables users to evaluate: (a) the nature of, and risks associated with, an entity's interests in other entities; and (b) the effects of those interests on the entity's financial position, financial performance and cash flows. The adoption of the new standard is required for annual periods beginning on or after 1 January 2013.

- Consolidated Financial Statements, Joint Arrangements and Disclosure of Interests in Other Entities: Transition Guidance (*Amendments to IFRS 10, IFRS 11, and IFRS 12*). The amendments: (a) simplify the process of adopting IFRS 10 and 11, and provide relief from the disclosures in respect of unconsolidated structured entities; (b) simplify the transition and provide additional relief from the disclosures that could have been onerous depending on the extent of comparative information provided in the financial statements; and (c) limit the restatement of comparatives to the immediately preceding period; this applies to the full suite of standards. Entities that provide comparatives for more than one period have the option of leaving additional comparative periods unchanged. In addition, the date of the initial application is now defined in IFRS 10 as the beginning of the annual reporting period in which the standard is applied for the first time. At this date, an entity tests whether there is a change in the consolidation conclusion for its investee. The adoption of the amendments is required for annual periods beginning on or after 1 January 2013.
- IFRS 13, *Fair Value Measurement*, replaces the fair value measurement guidance contained in individual IFRS with a single source of fair value measurement guidance. It defines fair value, establishes a framework for measuring fair value and sets out disclosure requirements for fair value measurements. It explains how to measure fair value when it is required or permitted by other IFRS. It does not introduce new requirements to measure assets or liabilities at fair value nor does it eliminate the practicability exceptions to fair value measurements that currently exist in certain standards. The adoption of the new standard is required for annual periods beginning on or after 1 January 2013.
- IAS 28, *Investments in Associates and Joint Ventures* (2011), supersedes IAS 28 (2008). IAS 28 (2011) makes the following amendments: (a) IFRS 5, *Noncurrent Assets Held for Sale and Discontinued Operations*, applies to an investment, or a portion of an investment, in an associate or a joint venture that meets the criteria to be classified as held for sale; and (b) on cessation of significant influence or joint control, even if an investment in an associate becomes an investment in a joint venture or *vice versa*, the entity does not remeasure the retained interest.

The adoption of the amendments is required for annual periods beginning on or after 1 January 2013.

- *Improvements to IFRS 2009-2011* contain amendments to standards with consequential amendments to other standards and interpretations, the adoption of which did not have an effect on the consolidated financial statements.
- *Comparative Information beyond Minimum Requirements (Amendments to IAS 1)*. These amendments clarify the requirements for comparative information that are disclosed voluntarily and those that are mandatory due to retrospective application of an accounting policy, or retrospective restatement or reclassification of items in the financial statements. An entity must include comparative information in the related notes to the financial statements when it voluntarily provides comparative information beyond the minimum required comparative period. The additional comparative period does not need to contain a complete set of financial statements. On the other hand, supporting notes for the third balance sheet (mandatory when there is a retrospective application of an accounting policy, or retrospective restatement or reclassification of items in the financial statements) are not required. The adoption of the amendments is required for annual periods beginning on or after 1 January 2013.
- *Presentation of the Opening Statement of Financial Position and Related Notes (Amendments to IAS 1)*. The amendments clarify that: (a) the opening statement of financial position is required only if there is: (i) a change in accounting policy; (ii) a retrospective restatement; or (iii) a reclassification which has a material effect upon the information in that statement of financial position; (b) except for the disclosures required under IAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors*, notes related to the opening statement of financial position are no longer required; and (c) the appropriate date for the opening statement of financial position is the beginning of the preceding period, rather than the beginning of the earliest comparative period presented.

This is regardless of whether an entity provides additional comparative information beyond the minimum comparative information requirements. The amendments explain that the requirements for the presentation of notes related to additional comparative information and those related to the opening statement of financial position are different, because the underlying objectives are different. Consequential amendments have been made to IAS 34, *Interim Financial Reporting*. The adoption of the amendments is required for annual periods beginning on or after 1 January 2013.

- *Classification of Servicing Equipment (Amendments to IAS 16, Property, Plant and Equipment)*. The amendments clarify the accounting of spare parts, stand-by equipment and servicing equipment. The definition of “property, plant and equipment” in IAS 16 is now considered in determining whether these items should be accounted for under this standard. If these items do not meet the definition, then they are accounted for using IAS 2, *Inventories*. The adoption of the amendments is required for annual periods beginning on or after 1 January 2013.
- *Income Tax Consequences of Distributions (Amendments to IAS 32, Financial Instruments Presentation)*. The amendments clarify that IAS 12, *Income Taxes*, applies to the accounting for income taxes relating to: (a) distributions to holders of an equity instrument; and (b) transaction costs of an equity transaction. This amendment removes a perceived inconsistency between IAS 32 and IAS 12.

Before the amendment, IAS 32 indicated that distributions to holders of an equity instrument are recognized directly in equity, net of any related income tax. However, IAS 12 generally requires the tax consequences of dividends to be recognized in profit or loss. A similar consequential amendment has also been made to IFRIC 2, *Members' Share in Co-operative Entities and Similar Instruments*. The adoption of the amendments is required for annual periods beginning on or after 1 January 2013.

Segment Assets and Liabilities (*Amendments to IAS 34*). This is amended to align the disclosure requirements for segment assets and segment liabilities in interim financial statements with those in IFRS 8, *Operating Segments*. IAS 34 now requires the disclosure of a measure of total assets and liabilities for a particular reportable segment. In addition, such disclosure is only required when: (a) the amount is regularly provided to the chief operating decision maker; and (b) there has been a material change from the amount disclosed in the last annual consolidated financial statements for that reportable segment. The adoption of the amendments is required for annual periods beginning on or after 1 January 2013.

Except as otherwise indicated, the adoption of these foregoing new or revised standards, amendments to standards and Interpretations of IFRIC did not have a material effect on the condensed interim financial statements.

- Amendments to IAS 27, *Separate Financial Statements* are effective for financial statements for the annual period beginning on or after 1 January 2013 but are not applicable to the Group financial statements.
- IAS 19, *Employee Benefits* (Amended 2011), includes the following requirements: (a) actuarial gains and losses are recognized immediately in other comprehensive income; this change will remove the corridor method and eliminate the ability of entities to recognize all changes in the defined benefit obligation and in plan assets in profit or loss, which is currently allowed under IAS 19; and (b) expected return on plan assets recognized in profit or loss is calculated based on the rate used to discount the defined benefit obligation. The adoption of the amendments is required to be retrospectively applied for annual periods beginning on or after 1 January 2013. The Group adopted the amendments to IAS 19 with 31 December 2012 financial statements restated for comparative purposes. The effects of the adoption on the financial statements are shown in Note 17, Employee Benefits.

New standards or Revised Standards, Amendments to Standards and Interpretations Not Yet Adopted

A number of new or revised standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2013, and have not been applied in preparing the financial statements. Except as otherwise indicated, none of these is expected to have a significant effect on the financial statements of the Group. The Group does not plan to adopt these standards early. The Group will adopt the following new or revised standards, amendments to standards and interpretations on the respective effective dates:

- Offsetting Financial Assets and Financial Liabilities (*Amendments to IAS 32*). The amendments clarify that: (a) an entity currently has a legally enforceable right to set-off if that right is: (i) not contingent on a future event; and (ii) enforceable both in the normal course of business and in the event of default, insolvency or bankruptcy of the entity and all counterparties; and (b) gross settlement is equivalent to net settlement if and only if the gross settlement mechanism has

features that: (i) eliminate or result in insignificant credit and liquidity risk; and (ii) process receivables and payables in a single settlement process or cycle. The adoption of the amendments is required to be retrospectively applied for annual periods beginning on or after 1 January 2014.

- IFRS 9, *Financial Instruments (2010) and (2009)*. IFRS 9 (2009) introduces new requirements for the classification and measurement of financial assets. Under IFRS 9 (2009), financial assets are classified and measured based on the business model in which they are held and the characteristics of their contractual cash flows. IFRS 9 (2010) introduces additions relating to financial liabilities. The International Accounting Standards Board currently has an active project to make limited amendments to the classification and measurement requirements of IFRS 9 and add new requirements to address the impairment of financial assets and hedge accounting. IFRS 9 (2010 and 2009) is effective for annual periods beginning on or after 1 January 2015. The Group is still evaluating the possible financial impact of the adoption of IFRS 9 and does not plan to adopt this standard early.
- IFRIC 21, *Levies*, the interpretation provides guidance on the accounting for government levies. The obligating event that gives rise to a liability to pay a levy is the activity that triggers the payment of the levy. If the activity that triggers the payment of the levy is the generation of revenue in the current period and the calculation of that levy is based on the revenue that was generated in a previous period, the obligating event for that levy is the generation of revenue in the current period. The liability to pay a levy is recognised progressively if the obligating event occurs over a period of time. The Group is still evaluating the possible financial impact of the adoption to the financial statements.
- Recoverable amount disclosure for non-financial assets (*Amendments to IAS 36*). The amendments require additional disclosure on the fair value measurement when the recoverable amount of impaired assets is based on fair value less costs of disposal method.

As at 30 June 2013, there were no leased property, plant and equipment.

At 30 June 2013, the Group has no legal or constructive obligation to dismantle any of its leasehold improvements as the lease contracts provide, among other things, that the improvements introduced on the leased assets shall become the property of the lessor upon termination of the lease.

Freehold land of the Group located in the Philippines at 30 June 2013 is stated at fair value of US\$5,643,000 (2012: US\$5,941,000) based on prior year independent valuation by LCH Philippines Inc, Manila, Philippines, on an existing use basis. Management has assessed that the fair value of the freehold land is not significantly different from its carrying value as at 30 June 2013.

Freehold land of the Group located in Singapore at 30 June 2013 is stated at fair value of US\$3,591,000 (2012: US\$3,781,000) based on prior year independent valuation by CB Richard Ellis, Singapore, on an existing use basis. Management has assessed that the fair value of the freehold land is not significantly different from its carrying value as at 30 June 2013.

The carrying amount of the freehold land would have been US\$2,282,000 (2012: US\$2,282,000) had the freehold land been carried at cost less impairment losses.

Trademarks

Indian sub-continent trademark

In November 1996, a subsidiary, DMPRL, entered into a sub-license agreement with an affiliated company to acquire the exclusive right to use the "Del Monte" trademark in the Indian sub-continent territories in connection with the production, manufacture, sale and distribution of food products and the right to grant sub-licences to others ("Indian sub-continent trademark"). This led to the acquisition of the joint venture, FieldFresh Foods Private Limited ("FFPL") in 2007 and the grant of trademarks to FFPL to market the company's product under the "Del Monte" brand name. The net carrying amount and the remaining amortisation period of the Indian sub-continent trademark as at 30 June 2013 are US\$4,459,000 and 23.5 years (2012: US\$4,649,000 and 24.5 years) respectively.

Philippines trademarks

A subsidiary, Dewey, owns the "Del Monte" and "Today's" trademarks for use in connection with processed foods in the Philippines ("Philippines trademarks"). The net carrying amount and the remaining amortisation period of the Philippines trademarks as at 30 June 2013 are US\$1,981,000 and 17.5 years (2012: US\$2,094,000 and 18.5 years) respectively.

Management has reviewed for indicators of impairment for the Philippines trademarks and concluded that no indication of impairment exist at the balance sheet date.

S&W trademark

In November 2007, a subsidiary, S&W Fine Foods International Limited, entered into an agreement with Del Monte Corporation to acquire the exclusive right to use the "S&W" trademark in Asia (excluding Australia and New Zealand), the Middle East, Western Europe, Eastern Europe and Africa for a total consideration of US\$10,000,000. The net carrying amount and the remaining amortisation period of the "S&W" trademark as at 30 June 2013 are US\$8,618,000 and 34.5 years (2012: US\$8,868,000 and 35.5 years) respectively.

7. Deferred tax assets

Deferred tax liabilities and assets are offset when there is a legally enforceable right to set-off current tax assets against current tax liabilities and when the deferred taxes relate to the same tax authority.

The effects of the amendments in IAS 19, Employee benefits have already been retrospectively applied in the Deferred Tax Asset account. The impact of change is summarized in Note 17, Employee Benefits.

Movements in deferred tax assets and liabilities of the Group during the year are as follows:

Group	At 1 January US\$'000 (Restated)	Charged/ (credited) to profit or loss US\$'000	Charged/ (credited) to other comprehensive income US\$'000	Currency realignment US\$'000	At 30 June US\$'000

The Group has also issued share awards under the Del Monte Pacific Restricted Share Plan ("Del Monte Pacific RSP") and Del Monte Pacific Performance Share Plan ("Del Monte Pacific PSP") during the current financial year.

The US\$2,157,000 or 215,719,000 shares increase in the share capital relates to the bonus share issued on 19th April 2013 to shareholders of the company pursuant to the bonus issue.

The holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at meetings of the Group. All shares rank equally with regard to the Group's residual assets.

14. Reserves

	Group		Company

	<u>224,891</u>	<u>241,777</u>	<u>76,834</u>	<u>100,432</u>

The revaluation reserve relates to surplus on the revaluation of freehold land of the Group.

The reserve for the Company's own shares comprises the cost of the Company's shares held by the Group. At 30 June 2013, the Group held 1,559,000 of the Company's shares (2012: 6,545,000).

Under the British Virgin Islands law in whose jurisdiction the Company operates, the Company's share premium and revenue reserve form part of the Company's surplus account that may be available for dividend distribution. The Group's share premium is shown net of a merger deficit of US\$139,000, which arose from the acquisition of a subsidiary, Del Monte Pacific Resources Limited, under common control in 1999.

The share option reserve comprises the cumulative value of employee services received for the issue of share options.

The translation reserve comprises foreign exchange differences arising from the translation of the financial statements of foreign entities.

16. Employee Benefits

A subsidiary, DMPI, has a funded, non-contributory defined benefit retirement plan covering substantially all of its officers and regular full-time employees. The benefits are based on a percentage of latest monthly salary and credited years of service.

Adoption of the Amendments to PAS 19

The adoption of the amendments to PAS 19 resulted in certain changes to the Group's previous accounting policies. The amendments were applied on a retroactive basis and comparative statements for 2012 have been restated to reflect the changes in accounting policies.

The effects of the adoption on the financial statements are as follows:

Source of estimation uncertainty

Pension expense and pension assets/liabilities are determined using certain actuarial estimates and assumptions relating to the discount rate used in valuing the subsidiary's defined benefit obligations and future experiences such as the rate of return on plan assets, future salary increases, retirement date or age, and mortality and turnover rate of covered employees. These estimates and assumptions directly influence the amount of the pension assets/liabilities and expense recognised in the financial statements.

20. Earnings per share

Basic and diluted earnings per share are calculated by dividing the net profit attributable to shareholders by the weighted average number of ordinary shares in issue during the year.

Group

	June 30, 2013	June 30, 2012 (Restated)
Basic earnings per share is based on:		
Profit for the year (US\$'000)	10,644	10,433
Basic weighted average number of ordinary shares ('000):		
Issued ordinary shares at 1 January	1,081,781	1,081,781
Effect of own shares held	(11,677)	(8,614)
Effect of share options exercised	10,777	7,055
Effect of bonus shares (note 13)	215,719	–
Weighted average number of ordinary shares at 30 June (basic)	1,296,600	1,080,222
Basic earnings per share (in US cents)	0.82	0.97

For the purpose of calculation of the diluted earnings per ordinary share, the weighted average number of ordinary shares in issue is adjusted to take into account the dilutive effect arising from ESOP and Del Monte Pacific RSP, with the potential ordinary shares weighted for the period outstanding.

The effect of ESOP and Del Monte Pacific RSP on the weighted average number of ordinary shares in issue is as follows:

	Group June 30, 2013	June 30, 2012 (Restated)
Diluted earnings per share is based on:		
Profit for the year (US\$'000)	10,644	10,433
Diluted weighted average number of shares ('000):		
Weighted average number of ordinary shares at 30 June (basic)	1,296,600	1,080,222
Potential ordinary shares issuable under share options	900	3,984
Weighted average number of ordinary issued and potential shares assuming full conversion	1,297,500	1,084,206
Diluted earnings per share (in US cents)	0.82	0.96

21. Dividends

	Group and Company June 30, 2013 US\$'000	June 30, 2012 US\$'000
Tax-exempt final dividend paid in respect of the previous financial year of 1.51 US cents (2012: 1.45 US cents)	16,297	15,599
	16,297	15,599

Subsequent to the period ended, the Directors declared a tax-exempt interim dividend of 0.62 US cents per share (2012: 0.72 US cents per share), amounting to US\$7,983,000 (2012: US\$7,771,000) in respect of the period ended 30 June 2013. These dividends have not been provided for in these financial statements.

22. Operating segments

The Group has two reportable segments, as described below, which are the Group's strategic business units. The strategic business units are based on whether the products are sold as branded or non branded. They are managed separately because they require different business development and growth strategies due to the differing market dynamics. For each of the strategic business units, the Group's Executive Committee (the chief operating decision maker) reviews internal management reports on at least a quarterly basis. The following summary describes the operations in each of the Group's reportable segments:

Information regarding the results of each reportable segment is included below. Performance is measured based on segment profit before income tax, as included in the internal management reports that are reviewed by the Group's Executive Committee. Segment profit before income tax is used to measure performance as management believes that such information is the most relevant in evaluating the results of certain segments relative to other entities that operate within these industries. The segment assets reviewed by the Group's Executive Committee relate to the trade receivables arising from the operations of the segment business.

-Branded Business

- Includes sales of Del Monte and S&W branded products.

-Non Branded Business

- Non-supply contract
 - a. Asia Pacific – Includes sales of private label and non branded processed fruits, beverages and other processed products, fresh fruit and cattle in the Asia Pacific region and sales of private label processed fruits, beverages and other processed products, fresh fruit and cattle to a non-affiliated Del Monte company at market price in the Asia Pacific region.
 - b. Europe and North America – Includes sales of private label and non branded processed fruits, beverages and other processed products in Europe and North America and sales of private label processed fruits, beverages and other processed products to a non-affiliated Del Monte company at market price in Europe and North America.
- Supply contract – Includes sales of processed fruits, beverages and fresh fruit to non-affiliated Del Monte companies under the long term supply contracts.

Seasonality of Sales

- The peak sales of branded products are generally in the fourth quarter of the year due to the festive Christmas season, most especially in the Philippine market.
- For non branded non supply contract Asia Pacific sales, there is no significant seasonality in terms of revenue.

- For non branded non supply contract Europe and North America sales, higher sales are experienced during holiday seasons.
- For non branded supply contract, sales are higher during holiday seasons.

Revenue from one customer of the Group's Non Branded segment for the six months ended June 2013 amounted to approximately US\$26,332 (Six months ended 30 June 2012: US\$28,349), representing 13% (2012: 15%) of the Group's total revenue.

23. Share option and incentive plans

The ESOP of the Company was approved and amended by its members at general meetings held on 30 July 1999 and 21 February 2002 respectively. No further options could be granted pursuant to the ESOP as it had expired on 24 July 2009. Any options granted by the Company prior to 24 July 2009 would continue to be valid for a period of 10 years from the date of the grant of options.

The Company's shareholders also approved the adoption of two share plans, Del Monte Pacific RSP and Del Monte Pacific PSP (collectively the "Share Plans"), at a general meeting held on 26 April 2005. The Share Plans seek to increase the Company's flexibility and effectiveness in its continuing efforts to reward, retain and motivate employees, and are currently targeted at executives in key positions, to excel in their performance.

Other information regarding the Del Monte Pacific RSP are as follows:

- (a) No minimum vesting periods are prescribed.
- (b) The length of the vesting period(s) in respect of each award granted will be determined on a case-to-case basis by the RSOC.
- (c) Delivery of shares upon vesting of the share awards may be by way of an issue of new shares and/or the transfer of existing shares (by way of purchase of existing shares).

On 7 March 2008, three employees of related companies were granted an aggregate of 1,725,000 share awards at the market price of S\$0.615 per share.

On 20 May 2008, 1,611,000 shares were awarded at the market price of S\$0.680 per share to Mr Joselito D Campos, Jr, an associate of a controlling shareholder, approved by shareholders at the Annual General Meeting of the Company held on 28 April 2008.

On 12 May 2009, six employees of related companies were granted an aggregate of 3,749,000 share awards at the market price of S\$0.540 per share.

On 29 April 2012, 2,643,000 shares were awarded at the market price of S\$0.485 per share to Mr Joselito D Campos, Jr, an associate of a controlling shareholder, approved by shareholders at the Annual General Meeting of the Company held on 29 April 2012.

On 21 November 2012, 67,700 shares were awarded to a Non-Executive Director of the Company at the market price of S\$0.455 per share.

Other information regarding the Del Monte Pacific PSP is set out below:

- (a) Vesting periods are not applicable.
- (b) Shares awarded are released at the end of the performance period (typically, at the conclusion of a financial year end) once the RSOC is satisfied that the prescribed performance target(s) have been achieved by awardees.
- (c) Delivery of share awards may be by way of an issue of new shares and/or the transfer of existing shares (by way of purchase of existing shares).

As at the date of this report, no share awards have been granted pursuant to the Del Monte Pacific PSP.

The RSOC is responsible for administering the ESOP and the share plans.

Details of the outstanding options granted to the Company's directors and employees under the ESOP and Del Monte Pacific RSP on unissued ordinary shares of Del Monte Pacific Limited at the end of the year, are as follows:

The fair value of services received in return for share options granted are measured by reference to the fair value of share options granted. The estimate of the fair value of the services received is measured based on a Black-Scholes model. The expected life used in the model has been adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions and behavioural considerations.

Fair value of share options and assumptions

Date of grant of options	7 Mar 2008	30 Apr 2013	7 Mar 2008	20 May 2008	12 May 2009	29 Apr 2011	21 Nov 2011	30 Apr 2013

The expected volatility is based on the historic volatility (calculated based on the weighted average expected life of the share options), adjusted for any expected changes to future volatility due to publicly available information.

There are no market conditions associated with the share option grants. Service conditions and non-market performance conditions are not taken into account in the measurement of the fair value of the services to be received at the grant date.

Sources of estimation uncertainty

The fair value of share options granted is estimated using the Black-Scholes Model, which requires the Group to estimate the expected volatility of the Company's shares and expected life of the share options. The Group assesses the estimates whenever there is an indication of a significant change in these conditions. An increase in the fair value of share options granted will increase share option expense and share option reserve.

24. Financial risk management

The Group has exposure to the following risks:

- credit risk
- interest rate risk
- liquidity risk
- market risk

Risk management framework

The Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework. The Audit Committee is responsible for developing and monitoring the Group's risk management policies. The committee reports regularly to the Board of Directors on its activities. The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits.

Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Audit Committee oversees how management monitors compliance with the Group's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Audit Committee is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

Financial risk management objectives and policies

Risk management is integral to the whole business of the Group. The Group has a system of controls in place to create an acceptable balance between the cost of risks occurring and the cost of managing the risks. The Board continually monitors the Group's risk management process to ensure that an appropriate balance between risk and control is achieved.

Credit risk

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the demographics of the Group's customer base, including the default risk of the industry and country in which customers operate, as these factors may have an influence on credit risk. Approximately 13% (2012: 15%) of the Group's revenue is attributable to sales transactions with a single international customer. However, geographically, there is no concentration of credit risk.

The Audit Committee has approved a credit policy under which each new customer is analysed individually for creditworthiness before the Group's standard payment and delivery terms and conditions are offered. The Group's review includes external ratings, when available, and in some cases bank references. Purchase limits are established for each customer, which represents the maximum open amount. Customers failing to meet the Group's benchmark creditworthiness may transact with the Group only on a prepayment or Letters of Credit basis.

Exposure to credit risk

The maximum exposure to credit risk for trade and other receivables (excluding prepayments) at the reporting date by geographic region was:

	Group	
	2013	2012
	US\$'000	US\$'000
North America	14,542	9,054
Europe	6,202	11,220
Asia Pacific	65,107	73,216
	<u>85,851</u>	<u>93,490</u>

Impairment losses

The Group establishes an allowance for impairment that represents its estimate of incurred losses in respect of trade and other receivables. The main components of this allowance are a specific loss component that relates to individually significant exposures, and a collective loss component established for groups of similar assets in respect of losses that have been incurred but not yet identified. The collective loss allowance is determined based on historical data of payment statistics for similar financial assets.

The ageing of trade and other receivables (excluding prepayments) that were impaired at the reporting date was:

	Group	
	2013	2012
	US\$'000	US\$'000
Not past due	69,181	77,176
Past due 0 - 60 days	9,857	10,925
Past due 61 - 90 days	1,127	1,854
Past due 91 - 120 days	1,055	168
More than 120 days	4,631	3,367
	<u>85,851</u>	<u>93,490</u>

Interest rate risk

The Group's cash balances are placed with reputable global and major Philippine banks and financial institutions. The Group manages its interest income by placing the cash balances with varying maturities and interest rate terms. This includes investing the Company's temporary excess liquidity in short-term low-risk securities from time to time. The Group obtains financing through bank borrowings and leasing arrangements. Funding is obtained from bank loan facilities for both short-term and long-term requirement. The Group's policy is to obtain the most favourable interest rate available without increasing its foreign currency exposure.

Sensitivity analysis

A 1% general increase in interest rates at the reporting date would increase/ (decrease) profit or loss by the amounts shown below. There is no effect on equity. This analysis assumes that all other variables, in particular, foreign currency rates, remain constant.

	Group	
	Profit or Loss	
	June 30,	December
	2013	31, 2012
	US\$'000	US\$'000
Short-term deposits	5	—
Unsecured short-term and long-term borrowings	(1,811)	(1,405)
	<u>(1,806)</u>	<u>(1,405)</u>

A 1% general decrease in interest rates would have the equal but opposite effect on the amounts shown above, on the basis that all other variables remain constant.

Liquidity risk

The Group monitors its liquidity risk to ensure that it has sufficient resources to meet its liabilities as they become due, under both normal and stressed circumstances without incurring unacceptable losses or risk to the Group's reputation.

The Group maintains a balance between continuity of cash inflows and flexibility in the use of available and collateral free credit lines from local and international banks. Currently, the Group is entitled to a total of US\$449 million (2012: US\$364 million) in credit lines, of which only 39% (2012: 38%) is availed. The lines are mostly for short term financing requirements, with US\$19 million (2012: US\$19 million) available for long term requirements. The Group constantly maintains good relations with its banks, such that additional facilities, whether for short or long term requirements, may be made available.

Foreign exchange risk

The Group is exposed to foreign exchange risk from its subsidiaries operating in foreign countries, which generate revenue and incur costs in foreign currencies, and from those operations of its local subsidiaries, which are in foreign currencies. The currency giving rise to this risk is primarily Philippine Peso.

The Company and its subsidiaries maintain their respective books and accounts in their functional currencies. As a result, the Group is subject to transaction and translation exposures resulting from currency exchange rate fluctuations, especially between the Philippine peso and US dollar. To a certain extent, the Group has a natural hedge between the latter two currencies due to its revenue and cost mix. It is the Group's policy to optimize its natural hedge.

At 30 June and 31 December, the Group's exposure to US dollar is as follows:

	Group	
	June 30,	December
	2013	31, 2012
	US\$'000	US\$'000
Trade and other receivables	4,514	1,778
Cash and cash equivalents	1,826	7,550
Financial liabilities	(95,862)	(92,412)
Trade and other payables	(9,276)	(10,580)
	<u>(98,789)</u>	<u>(93,664)</u>

Sensitivity analysis

A 10% strengthening of the subsidiaries' foreign currency against the US dollar at the reporting date would increase profit or loss by US\$1,838,000 (December 2012: US\$9,366,000). This analysis assumes that all other variables, in particular interest rates, remain constant.

A 10% weakening of the subsidiaries' foreign currency against the US dollar would have the equal but opposite effect on the amounts shown above, on the basis that all other variables remain constant.

Credit risk

The Group sells its products through major distributors and buyers in various geographical regions. For the year ended 30 June 2013, the Group's major customers collectively accounted for 16% (2012: 19%) of its total revenue. Management has a credit risk policy which includes, among others, the requirement of certain securities to ensure prompt observance and performance of the obligations of its distributors and other buyers from time to time. The Group monitors its outstanding trade receivables on an on-going basis. In addition, the Group also engages in sale of its trade receivables without recourse to certain financial institutions.

The percentages of cash and bank balances held in the following regions are:

	Group	
	2013	2012
	%	%
Philippines	65	72
Hong Kong	28	24
Mauritius	6	—
Singapore	<u>1</u>	<u>4</u>

Apart from the above, the Company and the Group have no significant concentration of credit risk with any single counterparty or group counterparties. The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the balance sheets.

Commodity price risk

The Group is regularly engaged in the purchase of tinplates and fuel and is significantly exposed to commodity price risk related to tinplates and fuel. The Group ensures future supply of tinplates while minimising the impact of price movements by purchasing tinplates and fuel in advance of the production requirements. These purchase contracts are entered into for the purpose of receipt or delivery of tinplates and fuel in accordance with the expected usage requirements of the Group. There are no outstanding purchase contracts as at 30 June 2012 and 2013.

The Group also purchases large volumes of papaya fruits for production and is significantly exposed to commodity price risk related to papaya. The Group ensures long-term supply of papaya at stable prices by executing papaya supply agreements with farmers. The Group also subsidises some of the farmers' costs related to papaya to ensure long-term relationships with them.

Risk related to agricultural activities

The output of the plantation is subject to certain risk factors relating to weather conditions, crop yields, out growers and service providers' performance, and leasehold arrangements. To manage any impact from heavy rainfall and floods, plantings are done in various locations to minimize tonnage loss, and towing units have been augmented to ensure continuity of harvest during wet conditions. The Group is PhilGAP and GLOBALGAP certified and complies with proven agricultural practices in the pineapple growing operations. Long-term land leases with staggered terms are also secured.

International business risk

The Group's overall earnings from its trading activities with international customers are primarily affected by movements in the worldwide supply, demand and prices of its products. Prices for pineapple juice concentrate are largely affected by the supply situation in Thailand and the demand situation in the international markets. Given that this is an industrial commodity product, prices are quite volatile. The Group is shifting production towards more branded ready-to-drink beverage to decommo-ditise its concentrate product.

Branded business risk

The Group's branded business in the Philippines and the Indian subcontinent through Del Monte, and in Asia and the Middle East through S&W, is affected by a number of factors, including, but not limited to competition, acceptance of new products, industry trends, distribution expansion, penetration and business partners' risks. The Group's exposure to these risks is managed through the following processes, among others:

- Focus on consumption-driven marketing strategies
- Shift to branded value-added, packaged products with emphasis on innovation, health and wellness, quality, competitiveness and consumer appeal
- Market and customer diversification
- Increased penetration of high-growth distribution channels and markets
- Building on closer working relationships with business partners

Operational risk

As an integrated producer of processed and fresh fruit products for the world market, the Group's earnings are inevitably subject to certain other risk factors, which include general economic and business conditions, change in business strategy or development plans, production efficiencies, input costs and availability, litigious counterparties, communist rebel activities and changes in government regulations, including, without limitation, environmental regulations. The Group develops and executes a long-term strategic plan and annual operating plan, supported by a contingency plan and risk management measures. It also pursues productivity-enhancing and efficiency-generating work practices and capital projects. To manage insurgency risks in its operating units in the Philippines, the Group has strengthened security measures.

Compliance

The Group closely monitors changes in legislation and government regulations affecting the Group's business. It has a compliance programme that aims to monitor and ensure the Group's compliance with laws and regulations. Compliance is a regular board agenda item.

25. Accounting classification and fair values

Fair values

Estimation of fair values

Other financial assets and liabilities

The carrying amounts of other financial assets and liabilities with a maturity of less than one year (including trade and other receivables, cash and cash equivalents, trade and other payables and short term borrowings) are assumed to approximate their fair values because of the short period to maturity.

26. Commitments

Operating lease commitments

Based on the existing agreements, the future minimum rental commitments as at 30 June for all non-cancellable long-term leases of real property, offices and equipment and grower agreements (including the estimated rental on lands previously owned by National Development Corporation (NDC) and submitted for land distribution in compliance with the Comprehensive Agrarian Reform Law (CARL)) are as follows:

	Group	
	2013	2012
	US\$'000	US\$'000
July-December	7,251	3,598
Within one year	7,236	6,627
Between one to five years	31,651	30,531
More than five years	53,128	55,670
	<u>99,266</u>	<u>96,426</u>

Included in the above are commitments denominated in Philippine Peso of PHP4,295 million, equivalent to US\$99,266,000 (2012: PHP4,155 million, equivalent to US\$94,606,000).

The leases typically run for an initial period of 2 to 25 years, with an option to renew the lease after that date. Some of the leases contain escalation clauses but do not provide for contingent rents. Lease terms do not contain any restrictions on Group activities concerning dividends, additional debts or further leasing.

Supply contracts

The Group currently has international supply contracts with entities, which have exclusive rights to the Del Monte trademarks in their respective territories or product categories. The Group has such agreements in respect of processed foods with Del Monte Corporation (three-year notice of termination was served by the Group in November 2012) in North America (except Canada), Mexico and the Caribbean, and Del Monte Asia Pte Ltd in certain Asia Pacific countries (excluding the Philippines, the Indian subcontinent, Myanmar and Japan). The Group also has a supply contract for fresh pineapples with Del Monte Fresh Produce International Inc which will expire on 30 June 2017. These supply contracts are generally terminable by prior written notice with periods ranging between 18 to 36 months (from certain pre-agreed dates onwards).

27. Contingencies

As at 30 June 2013, a subsidiary, DMPL India Limited has a contingent liability amounting to INR 619 million (US\$11.1 million) in the form of a letter of undertaking securing 50% of the obligations of FieldFresh Foods Private Limited under its Loan Agreement with Infrastructure Development Finance Company Limited, in proportion to its equity interest.

28. Related parties

Related party transactions

For the purposes of these financial statements, parties are considered to be related to the Group if the Group has the ability, directly or indirectly, to control the party or exercise significant influence over the party in making financial and operating decisions, or vice versa, or where the Group and the party are subject to common control or common significant influence. Related parties may be individuals or other entities.

Other than disclosed elsewhere in the financial statements, transactions with related parties are as follows:

	Group		Company	
	June 30, 2013	June 30, 2012	June 30, 2013	June 30, 2012
	US\$'000	US\$'000	US\$'000	US\$'000

Shared IT Services from Nutri-Asia, Inc	(45)	(21)	—	—
	<u>(48)</u>	<u>(24)</u>	<u>248</u>	<u>232</u>

The transactions with related parties are carried out based on terms agreed between the parties. Pricing for the sales of products are market driven, less certain allowances. For purchases, the Group policy is to solicit competitive quotations. Bids from any related party are evaluated on arm's length commercial terms and subject to bidding against third party suppliers. Purchases are normally awarded based on the lowest price.

29. Other Matters

a. On 19 February 2013, an armed group entered Camp Phillips, a residential community for DMPI employees and an office site in Bukidnon, Mindanao, Southern Philippines. To secure its employees, DMPI sought for and obtained military security right after the incident. The incident did not affect DMPI's Plantation and Cannery operations.

b. On 10 June 2013, the Group listed 1.3 billion common shares on the Philippine Stock Exchange making it the first company to be listed on both the Philippine Stock Exchange and Singapore Exchange.

c. There were no known trends, demands, commitments, events or uncertainties that will have a material impact on the Group's liquidity.

d. There were no known trends, events or uncertainties that have had or that are reasonably expected to have a favourable or unfavourable impact on net sales or revenues or income from continuing operations.

e. There were no known events that will trigger direct or contingent financial obligation that is material to the Group, including any default or acceleration of an obligation and there were no changes in contingent liabilities and contingent assets since the last annual statements of financial position date.

f. There were no material off-statements of financial position transactions, arrangements, obligations (including contingent obligations), and other relationship of the Group with unconsolidated entities or other persons created during the reporting period.

g. The effects of seasonality or cyclicity on the interim operations of the Group's businesses are explained in Note 23, Operating Segments.

h. The Group's material commitments for capital expenditure projects have been approved but are still ongoing and not yet completed as of end of June 30 2013. These consist of construction, acquisition, upgrade or repair of fixed assets needed for normal operations of the business. The said projects will be carried forward to the next quarter until its completion. The fund to be used for these projects will come from available cash, short and long-term loans.

30. Key Performance Indicators

REVIEW OF OPERATING PERFORMANCE FOR 2Q AND FIRST HALF 2013

Second Quarter

Sales grew 11% to US\$121.0 million from US\$108.9 million due to better performance of both the branded and non branded businesses.

The branded business of DMPL in Asia, comprising of Del Monte in the Philippines and the Indian subcontinent as well as S&W in Asia and the Middle East, accounted for 66% of total sales in the second quarter. The branded business generated higher sales with an 8% growth, and operating profit of US\$8.7 million, up 14%.

Sales in the Philippines grew 8% driven by better performance of the processed fruit and culinary segments. Volume of both segments expanded by double digit growth rates, largely due to improvements in consumption frequency. The improved performance was supported by integrated new campaigns, new occasion offerings and product bundles, and recipe education. A buoyant domestic economy, increased store coverage, and compelling in-store shopper execution contributed to the overall improved performance in the Philippines. The Company increased its ready-to-drink beverage capacity in June in order to sustain its overall growth in line with its strategy to shift from pineapple juice concentrate for the export markets to branded beverage not just in the Philippines but also in the S&W markets.

The S&W branded processed segment delivered higher sales of 8% in the second quarter, a turnaround from the decline in the first quarter which was caused by delays in product listings by Middle East distributors as well as competition in the canned beverage and fruit categories. Both China and the Middle East generated significant growth in the second quarter as those issues had been addressed. The

S&W branded fresh business expanded by 21% driven by robust sales in Japan, China, Middle East and Singapore. The Group had higher supply of the premium fresh fruit in the second quarter which satisfied the strong fresh demand. Brand building with sampling activities are being executed in key markets of Korea, Japan, China and Singapore.

The Group's non branded business, comprising of industrial and private label sales, including sales to non-affiliated Del Monte companies under long term supply agreements, accounted for 34% of Group sales in the second quarter. The non branded business generated sales of US\$41.5 million, 18% higher year on year, and almost 50% stronger versus the first quarter. The increase in sales reflected an overall improvement in sales momentum with particularly robust growth in sales to North America of value-added products such as fruit in plastic cups and crushed pineapple in aseptic bags which have better margins.

Despite weaker pineapple juice concentrate prices year on year, the non-branded business turned in an operating profit of US\$1.5 million, slightly up year on year, but a marked recovery from the weak performance in the first quarter of a loss of US\$0.7 million. In addition to higher volume and a more favourable sales mix, the improved results of the non branded business reflected lower production and operating costs.

Group gross profit rose 5% to US\$28.4 million from US\$27.0 million on the back of higher sales, but gross margin declined to 23.4% from 24.8% due to higher cost of goods sold mainly warehousing and distribution costs. Meanwhile, operating income increased by 12% to US\$10.2 million.

In India, the Group recognised a share of loss of US\$1.3 million for its 46.6% stake in the FieldFresh joint venture, lower than prior year quarter's US\$1.5 million, on higher sales, improved product mix and reduced overheads.

The Group ended the quarter with a net profit attributable to the owners of the company of US\$6.1 million, 2% higher than that of the same period last year on favourable volume and sales mix coupled with lower equity loss in FieldFresh. However, the Group incurred one-off fees in relation to the dual listing of its shares on the Philippine Stock Exchange in June and also incurred an unrealised foreign exchange loss due to the weaker Peso against the US Dollar in May and June which affected translation of trade payables and loans. The Group will be optimising its natural hedge going forward. Stripping out the non-recurring expense and forex impact, net income would have grown by 13%.

Operating cash flow was at US\$17.2 million, reversal of previous inflow of US\$2.9 million. The Company ended the quarter with a net debt position of US\$162.2 million and a gearing of 69%, higher than prior year quarter's 54% due to higher borrowings to support working capital needs. The increase in inventory days was due to increased raw materials and packaging materials resulting from strategic purchase.

First Half

Sales rose 14% to US\$208.4 million from US\$183.6 million due to the strong performance of the Philippine market as well as the Fresh business.

Sales in the Philippines grew 18% versus the same period last year with improved performance for most product categories especially in the processed fruit segment for the same reasons cited in the second quarter.

Sales of S&W branded processed products declined by 14% to US\$6.3 million due to the weakness in the first quarter. There were delays in product listings by Middle East distributors as well as competition in the canned beverage and fruit categories. Second quarter performance had markedly improved with sales up 8%.

Sales of S&W fresh products were up 21% due to higher sales in Japan, China, Middle East and Singapore.

Non branded business was up 10% in the first half of the year due to better performance of the non supply contract segment which offset declines in the supply contract segment. However, non branded business' operating income was much lower, down 84%, due to lower prices of pineapple juice concentrate.

Group gross profit rose 8% to US\$48.2 million due to the strong performance of the Philippine market and the Fresh business with double digit sales growth. Gross margin however declined to 23.1% from 24.3% due to higher costs mainly warehousing and distribution-related.

Operating profit improved by 3% to US\$18.1million on higher sales.

The Group recognised a share of loss of US\$2.4 million for its 46.6% stake in the Indian FieldFresh joint venture, lower than prior year's loss of US\$3.2 million on higher sales, improved product mix and reduced overheads.

The Group generated a net profit attributable to owners of the company of US\$10.6 million, 2% higher than the US\$10.4 million in the prior year period. This was impacted by one off fees and an unrealised forex loss in the second quarter as mentioned above.

Operating cash outflow was US\$27.5 million, higher than of prior year's of US\$11.3 million, as the company increased its working capital to support higher levels of business. The Company ended the quarter with a gearing of 69% versus prior year period's 53% due to higher debt to support working capital requirements needed for operations.

VARIANCE FROM PROSPECT STATEMENT

The second quarter and first half 2013 results were in line with earlier guidance that the Group's 2013 profits are expected to be better compared to that of the same period last year.

BUSINESS OUTLOOK

The Group's branded business continues to grow strongly, supported by improved trade coverage and advertising, entry into new markets, and increased capacity of the ready-to-drink beverage which came onstream in June. Initiatives to expand sales of higher margin value added products led to a better sales mix and much improved margins.

Barring unforeseen circumstances, the Group expects to improve earnings in 2013 led by the branded business with higher revenue from better volume and sales mix in the Philippines and S&W markets. The Group is actively pursuing sales of higher margin value-added products as evidenced in the second quarter results. In addition, the Group continues to implement operational efficiencies, procurement savings and active cost management.

Second Quarter

Reported under the branded segment are sales and profit on sales in the Philippines, comprising primarily of Del Monte branded products, including Del Monte traded goods; S&W products in Asia and the Middle East; and Del Monte products from the Philippines into Indian subcontinent.

Turnover of the branded business, which accounted for 66% of the Group's turnover in the second quarter of 2013, grew 8% to US\$79.5 million from US\$73.8 million due to higher sales in the Philippines, and the S&W business.

Sales in the Philippines grew 8% driven by better performance of the processed fruit and culinary segments. Volume of both segments expanded by double digit growth rates, largely due to improvements in consumption frequency. The improved performance was supported by integrated new campaigns, new occasion offerings and product bundles, and recipe education. A buoyant domestic economy, increased store coverage, and compelling in-store shopper execution contributed to the overall improved performance in the Philippines. The Company increased its ready-to-drink beverage capacity in June in order to sustain its overall growth in line with its strategy to shift from pineapple juice concentrate for the export markets to branded beverage not just in the Philippines but also in the S&W markets.

The S&W branded processed segment delivered higher sales of 8% in the second quarter, a turnaround from the decline in the first quarter which was caused by delays in product listings by Middle East distributors as well as competition in the canned beverage and fruit categories. The Group had higher supply of the premium fresh fruit in the second quarter which satisfied the strong fresh demand. Brand building with sampling activities are being executed in key markets of Korea, Japan, China and Singapore.

Gross profit increased by 3% to US\$23.1 million while operating profit increased by 14% to US\$8.7 million mainly due to stronger sales.

Half Year

Turnover in the branded business, which accounted for 67% of the Group's turnover in the first half of 2013, grew 15% to US\$139.0 million from US\$120.6 million on higher sales in all major categories in the Philippines as well as the Fresh business.

Turnover in the Philippines rose 24% due to favourable mix, better prices and higher volume. Major categories registered remarkable growth, especially in the processed fruit category with strong increase in sales.

Sales of S&W branded processed products declined by 14% to US\$6.3 million due to the weakness in the first quarter. There were delays in product listings by Middle East distributors as well as competition in the canned beverage and fruit categories. Second quarter performance had markedly improved with sales up 8%. Sales of S&W fresh products were up 21% due to higher sales in Japan, China, Middle East and Singapore.

Due to higher volume, improved pricing and mix as well as cost improvements, gross profit for the branded segment significantly improved by 17% to US\$41.7 million. Operating profit increased by 33% to US\$17.4 million mainly due to better margins and stronger sales.

Second Quarter

Reported under the non branded segment are sales and profit on sales of private label and non branded processed fruits, beverages, other processed products and fresh fruit; and sales and profit on sales to non-affiliated Del Monte companies under long term supply contracts and under market prices.

Turnover of the non branded business accounted for 34% of Group turnover this quarter. The segment's sales increased by 18% to US\$41.5 million from US\$35.1, and a stronger 50% growth quarter on quarter. The increase in sales reflected an overall improvement in sales momentum with particularly robust growth in sales to North America of value-added products such as fruit in plastic cups and crushed pineapple in aseptic bags which have better margins.

Despite weaker pineapple juice concentrate prices year on year, the non-branded business turned in an operating profit of US\$1.5 million, slightly up year on year, but a marked recovery from the weak performance in the first quarter of a loss of US\$0.7 million. In addition to higher volume and a more favourable sales mix, the improved results of the non branded business reflected lower production and operating costs.

Half Year

The Group's turnover of non branded business accounted for 33% of Group sales in the first half of 2013. Turnover for non branded segment increased by 10% to US\$69.4 million from US\$63.1 million for the same reasons as those for the second quarter and higher sales of the non branded fresh business.

However, gross profit was down 28% to US\$6.4 million while operating income fell 84% to US\$0.7 million mainly due to lower pineapple juice concentrate prices.
