The Group has two types of operating segments: geographical and product. In identifying these operating segments, management generally considers geographical as its primary operating segment.

Geographical segments

Americas

Reported under the Americas segment are sales and profit on sales in USA, Canada, and Mexico. Majority of this segment's sales are principally sold under the Del Monte brand but also under the Contadina, S&W, College Inn and other brands. This segment also includes sales of private label food products. Sales across various channels include retail markets, as well as to the United States military, certain export markets, the food service industry and other food processors.

Asia Pacific

Reported under Asia Pacific are sales and profit on sales in the Philippines, comprising primarily of Del Monte branded packaged products, including Del Monte traded goods; S&W products in Asia both fresh and packaged; and Del Monte packaged products from the Philippines into Indian subcontinent as well as unbranded Fresh and packaged goods.

Europe and Middle East

Included in Europe segment are sales of unbranded products in Europe and Middle East.

Product segments

Packaged fruit and vegetable

The Packaged fruit and vegetable segment includes sales and profit of processed fruit and vegetable products under the Del Monte and S&W brands, as well as buyer's labels, that are packaged in different formats such as can, plastic cup, pouch and aseptic bag. Key products under this segment are canned beans, peaches and corn sold in the United States and canned pineapple and tropical mixed fruit in Asia Pacific.

Beverage

Beverage includes sales and profit of 100% pineapple juice in can, juice drinks in various flavours in can, tetra and PET packaging, and pineapple juice concentrate.

Culinary

Culinary includes sales and profit of packaged tomato-based products such as ketchup, tomato sauce, pasta sauce, recipe sauce, pizza sauce, pasta, broth and condiments under four brands namely Del Monte, S&W, College Inn and Contadina.

Fresh fruit and others

Fresh fruit and others include sales and profit of S&W branded fresh pineapples in Asia Pacific and buyer's label or non-branded fresh pineapples in Asia, and sales and profit of cattle in the Philippines. The cattle operation helps in the disposal of pineapple pulp, a residue of pineapple processing which is fed to the animals. This would also include non-branded sales to South America.

The Group allocated certain overhead and corporate costs to the various product segments based on sales for each segment relative to the entire Group.

Segment assets and liabilities

Segment assets consist primarily of property, plant and equipment, intangible assets and goodwill, trade and other receivables, biological assets, inventories, deferred tax assets - net, and investments in joint ventures. Segment liabilities consist of loans and borrowings, employee benefits, tax liabilities, and trade and other payables.

Major customer

Revenues from a major customer of the Americas segment for the quarters ended 31 July 2018 and 2017 amounted to US\$105.7 million and US\$135.1 million, respectively representing 28.7% and 29.1% of the total revenue, respectively.

4. Seasonality of operations

The Group's business is subject to seasonal fluctuations as a result of increased demand during the end of year festive season. For Americas, products are sold heavily during the Thanksgiving and Christmas seasons. As such, the Group's sales are usually highest during the three months from August to October.

The Group operates several production facilities in the U.S., Mexico, and Philippines. Fruit plants are located in California and Washington in the United States and Philippines, most of its vegetable plants are located in the U.S. Midwest and its tomato plants are located in California and Indiana.

The US Consumer Food Business has a seasonal production cycle that generally runs between the months of June and October. This seasonal production primarily relates to the majority of processed fruit, vegetable and tomato products, while some of its processed fruit and tomato products and its *College Inn* broth products are produced throughout the year. Additionally, the Consumer Food Business has contracts to co-pack certain processed fruit and vegetable products for other companies.

5. Property, plant and equipment

During the quarter ended 30 July 2018, the Group acquired assets with a cost of US\$25.1 million (year ended 30 April 2018: US\$110.7 million), which includes noncash acquisition.

Goodwill

Goodwill arising from the acquisition of DMFI was allocated to DMFI and its subsidiaries, which is considered as one cash generating unit (“CGU”).

Indefinite life trademarks

Management has assessed the following trademarks as having indefinite useful lives as the Group has exclusive access to the use of these trademarks. These trademarks are expected to be used indefinitely by the Group as they relate to continuing businesses that have a proven track record with stable cash flows.

America trademarks

The indefinite life trademarks of US\$394 million arising from the acquisition of Consumer Food Business relate to those of DMFI for the use of the “Del Monte” trademark in the United States and South America market, and the “College Inn” trademark in the United States, Australia, Canada and Mexico.

The Philippines trademarks

A subsidiary, Dewey, owns the “Del Monte” and “Today’s” trademarks for use in connection with processed foods in the Philippines (“The Philippines trademarks”) with carrying value amounting to US\$1.8 million.

Indian sub-continent trademark

In November 1996, a subsidiary, DMPRL, entered into a sub-license agreement with an affiliated company to acquire the exclusive right to use the “Del Monte” trademark in the Indian sub-continent territories in connection with the production, manufacture, sale and distribution of food products and the right to grant sub-licenses to others (“Indian sub-continent trademark”). This led to the acquisition of a joint venture, FFPL in 2007 and the grant of trademarks to FFPL to market the Company’s product under the “Del Monte” brand name. The trademark has a carrying value of US\$4.1 million.

Impairment test

Management has performed impairment testing for all indefinite life trademarks and concluded that no impairment exist at the reporting date.

Asia S&W trademark

In November 2007, a subsidiary, S&W, entered into an agreement with Del Monte Corporation to acquire the exclusive right to use the “S&W” trademark in Asia (excluding Australia and New Zealand), the Middle East, Western Europe, Eastern Europe and Africa for a total consideration of US\$10.0 million. The trademark has a carrying value of US\$8.2 million.

Sager Creek trademarks

The trademarks were acquired when the Group acquired the Sager Creek business in March 2015. Sager Creek's well-known brands include Veg-All, Freshlike, Popeye, Princella and Allens', among others. The Sager Creek trademarks were included in the sale of certain assets of Sager Creek in September 2017.

Customer relationships

Customer relationships relate to the network of customers where DMFI and Sager Creek has established relationships with the customers, particularly in the United States market through contracts.

	31 July 2018	30 April 2018
	US\$'000	US\$'000
Net carrying amount	83,275	84,612
Remaining amortisation period	15.6	15.8

Management has included the DMFI customer relationships in the DMFI CGU impairment assessment and concluded no impairment exist at the reporting date.

Source of estimation uncertainty

The Group estimates the useful lives of its amortisable trademarks and customer relationships based on the period over which the assets are expected to be available for use. The estimated useful lives of the trademarks and customer relationships are reviewed periodically and are updated if expectations differ from previous estimates due to legal or other limits on the use of the assets. A reduction in the estimated useful lives of amortisable trademarks and customer relationships would increase recorded amortisation expense and decrease noncurrent assets.

Group's interest in joint ventures		
FFPL	23,702	23,557
NFHKL	1,410	1,638
Carrying amount of investment in joint ventures	25,112	25,195

Source of Estimation Uncertainty

When the joint venture has suffered recurring operating losses, a test is made to assess whether the investment in joint venture has suffered any impairment by determining the recoverable amount. This determination requires significant judgement and estimation. An estimate is made of the future profitability, cash flow, financial health and near-term business outlook of the joint venture, including factors such as market demand and performance. The recoverable amount will differ from these estimates as a result of differences between assumptions used and actual operations.

Since its acquisition, the Indian sub-continent trademark (Note 6) and the investment in FFPL were allocated to the Indian sub-continent cash-generating unit ("Indian sub-continent CGU"). The recoverable amount of Indian sub-continent CGU was estimated using the discounted cash flows based on five-year cash flow projections.

Excess insurance relate mainly to reimbursements from insurers to cover certain workers' compensation claims liabilities (see Note 15).

The note receivables of US\$7.8 million relates to the sale of certain assets of Sager Creek which is payable in three years until 2020. The note receivables are payable in four installments bearing interest of 3.50% per annum for the first installment and 5.22% from the second installment up to the final installment. The current portion of US\$2.6 million is presented under "Trade and other receivables".

Land expansion comprises development costs of newly acquired leased areas including costs such as creation of access roads, construction of bridges and clearing costs. These costs are amortised on a straight-line basis over the lease periods of 10 years or lease term, whichever is shorter.

At end of the period/year		<u>15,980</u>	<u>26,616</u>

The allowance for inventory obsolescence recognised during the period is included in “Cost of sales”.

Source of Estimation Uncertainty

The Group recognises allowance on inventory obsolescence when inventory items are identified as obsolete. Obsolescence is based on the physical and internal condition of inventory items. Obsolescence is also established when inventory items are no longer marketable. Obsolete goods when identified are charged to income statement and are written off. In addition to an allowance for specifically identified obsolete inventory, estimation is made on a group basis based on the age of the inventory items. The Group believes such estimates represent a fair charge of the level of inventory obsolescence in a given year. The Group reviews on a monthly basis the condition of its inventory. The assessment of the condition of the inventory either increases or decreases the expenses or total inventory.

Estimates of net realisable value are based on the most reliable evidence available at the time the estimates are made of the amount the inventories expected to be realised. These estimates take into consideration fluctuations of price or cost directly relating to events occurring after reporting date to the extent that such events confirm conditions existing at the reporting date.

The Group reviews on a continuous basis the product movement, changes in customer demands and introductions of new products to identify inventories which are to be written down to the net realisable values. The write-down of inventories is reviewed periodically to reflect the accurate valuation in the financial records. An increase in write-down of inventories would increase the recorded cost of sales and operating expenses and decrease current assets

The Group's financial liabilities slightly increased by US\$66 million mainly driven by the increase in DMFI loan under an ABL Credit Agreement (a senior secured asset-based revolving facility) to be used for working capital needs and general corporate purposes (the "ABL Facility") from US\$10 million to US\$148 million as of 31 July 2018.

The unsecured bridging loans of US\$54 million as at 30 April 2018 is the remaining balance for the bridging loan that were obtained by the Company to finance the acquisition of Sager Creek and its related costs. In April 2017, DMPL settled US\$196.0 million of the US\$350.0 million BDO loan using the proceeds from the issuance of preference shares. In December 2017, DMPL settled an additional US\$100.0 million using the proceeds from the 10,000,000 Series A-2 Preference Shares.

18. Determination of fair values

Fair value hierarchy

The table below analyses recurring non-financial assets carried at fair value. The different levels are defined as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: unobservable inputs for the asset or liability.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing the categorization at the end of each reporting period.

For purposes of the fair value disclosure, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy, as explained above.

Determination of fair values of financial assets

A number of the Group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods.

Financial instruments measured at fair value

Type	Valuation technique
Forward exchange contracts	Market comparison technique: The fair values are based on brokers' quotes. Fair values reflect the credit risk of the instrument and include adjustments to take into account the credit risk of the Group and counterparty when appropriate.
Interest rate swaps	Market comparison technique: The fair values are calculated using a discounted cash flow analysis based on terms of the swap contracts and the observable interest rate curve. Fair values reflect the risk of the instrument and include adjustments to take into account the credit risk of the Group and counterparty when appropriate.
Commodities contracts	Market comparison technique: The commodities are traded over-the-counter and are valued based on the Chicago Board of Trade quoted prices for similar instruments in active markets or corroborated by observable market data available from the Energy Information Administration. The values of these contracts are based on the daily settlement prices published by the exchanges on which the contracts are traded.

Financial instruments not measured at fair value

Type	Valuation technique
Financial liabilities	<p>The fair value of the secured first and second lien term loans are calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date (Level 2). The fair value of noncurrent loans and borrowings under this category amounted to US\$644.2 million and US\$751.2 million as of 31 July 2018 and 30 April 2018, respectively.</p> <p>The fair value of the other loans is based on the discounted value of expected future cash flows using risk free rates and credit spread ranging from 2.0% to 5.3% (Level 3). The fair value of noncurrent loans and borrowings under this category amounted to US\$828.8 million and US\$611.5 million as at 30 April 2018, respectively.</p> <p>Current loans and borrowings approximate its carrying amount as of 31 July 2018 and 30 April 2018 due to short-term maturities.</p>
Other financial assets and liabilities	The notional amounts of financial assets and liabilities with maturity of less than one year (including trade and other receivables, cash and cash equivalents, and trade and other payables) are, because of the short period to maturity, assumed to approximate their fair values. All other financial assets and liabilities are discounted to determine their fair values.

Other non-financial assets

Assets	Valuation technique	Significant unobservable inputs
Freehold land	<p>The fair value of freehold land is determined by external, independent property valuers, having appropriate recognized professional qualifications and recent experience in the location and category of property being valued.</p> <p>The valuation method used is sales comparison approach. This is a comparative approach that consider the sales of similar or substitute properties and related market data and establish a value estimate by involving comparison (Level 3).</p>	<p>The unobservable inputs used to determine market value are the net prices, sizes, property location and market values. Other factors considered to determine market value are the desirability, neighbourhood, utility, terrain, and the time element involved.</p> <p>The freehold land was last revalued in 2016. The market value per square meter ranges from US\$62.9 to US\$69.6. The market value per acre ranges from US\$2,300 to US\$80,582.</p>
Harvested crops – sold as fresh fruit	The fair values of harvested crops are based on the most reliable estimate of market prices, in both local and international markets at the point of harvest. The market price is derived from average sales price of the fresh fruit adjusted for margin and costs to sell (Level 3).	The unobservable input is the estimated pineapple selling price per ton specific for fresh products.
Harvested crops – used in processed products	The fair values of harvested crops are based on the most reliable estimate of market prices, in both local and international markets at the point of harvest. The market price is derived from average sales price of the processed product (concentrates, pineapple beverages, sliced pineapples, etc.) adjusted for margin and associated costs related to production (Level 3).	The unobservable input is the estimated pineapple selling price and gross margin per ton specific for processed products.
Unharvested crops – fruits growing on the bearer plants	The growing produce are now measured at fair value from the time of maturity of the bearer plant until harvest. Management used future selling prices of finished goods less future growing costs applied to the estimated volume of harvest as the basis of fair value.	The unobservable inputs are estimated pineapple selling price and gross margin per ton for fresh and processed products, estimated volume of harvest and future growing costs.

	31 July	
	2018	2017
Basic profit/loss per share is based on:		
Profit attributable to owners of the Company (US\$'000)	3,022	740
Cumulative preference share dividends (US\$'000)	(4,938)	(3,313)
	(1,916)	(2,573)
Basic weighted average number of ordinary shares ('000):		
Issued ordinary shares at 1 May	1,943,670	1,943,214
Effect of shares option held	—	—
Weighted average number of ordinary shares at end of period (basic)	1,943,670	1,943,214

For the purpose of calculation of the diluted earnings per ordinary share, the weighted average number of ordinary shares in issue is adjusted to take into account the dilutive effect arising from Del Monte Pacific RSP, with the potential ordinary shares weighted for the period outstanding.

	Three months ended 31 July	
Diluted profit per share is based on:		
Profit (loss) attributable to owners of the Company (US\$'000)	3,022	740
Cumulative preference share dividends (US\$'000)	(4,938)	(3,313)
	(1,916)	(2,573)

Weighted average number of ordinary shares (basic)	1,943,670	1,943,214
Effect of share options on issue	–	746
Weighted average number of ordinary issued and potential shares assuming full conversion	1,943,670	1,943,670
Diluted loss per share (in U.S. cents)	(0.10)	(0.13)

The potential ordinary shares issuable under the Executive Stock Options Plan (ESOP) were excluded from the diluted weighted average number of ordinary shares calculation because they have an anti-dilutive effect.

Material Changes in Accounts

A. Cash and cash equivalent

Higher due to better working capital management mainly on lower inventories.

B. Inventories

Decrease in inventory is mainly due to reduced inventory driven by plant closure.

C. Trade and other receivables

The increase in trade and other receivables is mainly on the timing of collection.

E. Intangible assets

Decrease in intangibles is mainly attributed to the amortization for the year and sale of intangible assets of Sager Creek.

F. Trade & other payables

Decrease in trade and other payables is mainly due to lower trade payables and derivative liabilities.

H. Financial liabilities

Decrease in financial liabilities mainly due to payment of borrowings after issuance of preference shares.

Liquidity and Covenant Compliance

Certain unsecured bank loan agreements contain various covenants that are typical of these types of facilities such as financial covenants relating to required debt-to-equity ratio, interest cover, and maximum annual capital expenditure restrictions.

For the U.S.\$154.0 million loan, the debt shall not exceed 8 times the equity; the interest cover shall not be lower than 2.0 (EBIT over interest); and the capital expenditures shall not exceed U.S.\$40.0 million.

For the U.S.\$130 million loan, the debt shall not exceed 6.7 times the equity by end of FY 2017 and 3.0 times from FY 2018 to FY 2020; and the interest cover shall not be lower than 1.5 (EBIT over interest) in FY 2016 and 2.0 from FY 2017 to FY 2020.

The foregoing financial covenants apply to the Company and its subsidiaries, as Borrower, excluding DMFHL and its subsidiaries, including, but not limited to, DMFI.

The Group monitors its liquidity risk to ensure that it has sufficient resources to meet its liabilities as they become due, under both normal and stressed circumstances without incurring unacceptable losses or risk to the Group's reputation. The Group maintains a balance between continuity of cash inflows and flexibility in the use of available and collateral free credit lines from local and international banks and constantly maintains good relations with its banks, such that additional facilities, whether for short or long term requirements, may be made available.

As at 31 July 2018 and 30 April 2018, the Company is in compliance with the covenants stipulated in its loan agreements.

NOTES ON THE 1Q FY2019 DMPL RESULTS

1. DMPL's effective stake in DMFI is 89.4%, hence the non-controlling interest line (NCI) in the P&L. Net income/(loss) is net of NCI.
2. FY means Fiscal Year for the purposes of this MD&A.
3. DMPL Group adopted the amendments to IAS 16 and IAS 41 (Agriculture: Bearer Plants in April 2017). The change in accounting standard was applied retrospectively. This involved reclassifying a portion of biological assets to plant, property and equipment leading to much higher depreciation expense. However, for EBITDA calculation, the Group retained the old calculation using the lower depreciation for comparability.

REVIEW OF OPERATING PERFORMANCE

The Group achieved sales of US\$437.2 million for the first quarter of FY2019, down 7.7% versus the prior year period mainly due to lower sales across categories in the US and lower exports of processed pineapple products. The Sager Creek vegetable business was divested in September 2017. Stripping out Sager Creek's sales, the Group sales in the first quarter would have been lower by 6.7%.

The Group's US subsidiary, Del Monte Foods, Inc (DMFI) generated US\$308.3 million or 70.5% of Group sales. DMFI's sales declined by 8.4% from US\$336.5 million driven by lower volume across categories most significantly branded tomatoes and private label sales as well as unfavourable impact of lower pricing in foodservice for pineapple juice concentrate (PJC). The decline in sales was in line with DMFI's strategy to deprioritise non-profitable businesses, including private label.

The Company's thrust on innovation continued. Following the success of *Del Monte Fruit Refreshers* and *Del Monte Fruit & Chia*, *Del Monte Fruit & Oats* was launched in the USA in June. *Del Monte Fruit & Oats* combines healthy fruit and wholesome oats in a cup, is delicious, filling as well as convenient for breakfast and snack. Feedback from the trade has been encouraging. The Group also entered new product categories for foodservice with shipments of *Riced Cauliflower* and other vegetables with broadly positive industry reception.

Del Monte Nice Fruit Fresh Frozen Pineapple had also been placed at some regional chains in the USA. With the Nice Fruit revolutionary technology, frozen pineapple, when thawed, has the same physical properties as fresh cut pineapple.

Continued investments in consumer advertising and insights are paying dividends as DMFI's market share in canned vegetable, canned fruit and fruit cup snacks continue to grow.

DMFI generated lower gross profit and margin of 12.9% from 14.8% in the prior year period. Gross margin was impacted by increased cost to liquidate Sager Creek products, lower PJC pricing, and higher fixed cost per unit due to planned reduction in production volume in FY2018 to reduce inventory, in particular canned vegetable products, partly offset by lower trade spend.

As part of the Group's strategy to improve operational excellence and streamline operations, DMFI divested its underperforming Sager Creek vegetable business and also shut its Plymouth, Indiana tomato production facility in FY2018. These resulted in incremental one-off expenses amounting to US\$8.4 million pre-tax in the first quarter of FY2019, mostly for Sager Creek. Please refer to the last page of this MD&A for a schedule of the one-off items.

Excluding the one-off items, DMFI contributed an EBITDA of US\$4.2 million and a net loss of US\$18.7 million to the Group.

DMPL ex-DMFI generated sales of US\$140.9 million (inclusive of the US\$12.0 million sales by DMPL to DMFI which were netted out during consolidation). Sales were lower mainly due to decreased exports of processed pineapple products, and significantly lower PJC pricing as a result of the oversupply situation in Thailand, the main exporter of PJC. The Group has been shifting to more branded consumer beverage given the volatile nature of this industrial and commodity PJC.

DMPL ex-DMFI delivered lower gross margin of 26.5% from 31.7% in the prior year quarter mainly driven by lower PJC and packaged pineapple pricing, sales mix, higher product costs driven by commodity headwinds, devaluation of peso and lower benefit from revaluation of biological assets. These were partly offset by price increases in the Philippine market in line with inflation. DMPL ex-DMFI generated an EBITDA of US\$22.2 million which was lower by 19.6% and a net income of US\$10.8 million, lower versus the US\$15.2 million in the same period last year driven by lower margin as explained above partially offset by lower operating expenses.

Sales in the Philippines domestic market were flat in peso terms and down 5.3% in US dollar terms due to peso depreciation. Key accounts in foodservice and retail continued to grow offset by lower sales of Mixed Fruits in retail due to excess trade inventory. Del Monte Philippines (DMPI) launched *Del Monte Juice & Chews* nationally, a snack-in-a-drink combining nata and pineapple with fruit juice blends, a drink popular amongst teens. Foodservice sales in the Philippines remained strong, riding on the rapid expansion of quick service restaurants and convenience stores with partnerships and menu creation with major accounts.

Sales of the S&W branded business in Asia and the Middle East declined in the first quarter versus the prior year period mainly driven by lower sales of S&W packaged products mostly in North Asia and Turkey. Lower canned pineapple sales in North Asia were due to intense competition from cheaper products from Thailand and Indonesia. Due to the oversupply situation in Thailand, their exporters cut their canned pineapple prices significantly. Turkey, on the other hand, was impacted by political instability and currency devaluation. To diversify its business, the Group had introduced tomato and pasta sauces from the Philippines into S&W's Asian markets in FY2018. Despite lower sales, the S&W business was able to deliver higher operating profit and a 5.5 ppt increase in operating margin due to lower costs.

The Group's Nice Fruit joint venture in frozen pineapple successfully launched frozen pineapple spears in Japan last June. These are produced in Bukidnon, Philippines. Individually packaged and known as "Pineapple Stick", it is available in about 70% of 7-Eleven outlets or about 14,000 stores in Japan. It is positioned as an on-the-go healthy snack placed in the store's chiller section, and has received good feedback.

DMPL's share in the Field Fresh joint venture in India was favourable at US\$0.1 million profit, a significant improvement from the US\$0.5 million loss in the prior year period due to improved sales and margins.

The Group's gross profit and operating profit were lower than prior year period due to lower exports of processed pineapple products, lower sales of branded products in the US, unfavourable impact of lower, cyclical PJC pricing, unfavourable sales mix in Philippines, incremental costs to liquidate residual Sager Creek inventory, and higher product costs both in Asian operations and in the US that were partly offset by the price increase in Philippines in line with inflation, and lower trade spend in the US.

The Group's EBITDA of US\$18.8 million was lower than prior year quarter's EBITDA of US\$32.2 million. This quarter's EBITDA included the US\$8.4 million of one-off expenses mentioned above. Without the one-off expenses, the Group recurring EBITDA was US\$27.3 million. This was lower versus prior year quarter's recurring EBITDA of US\$33.1 million due to the factors mentioned above.

The Group reported a net income of US\$3.0 million for the quarter, higher compared to the net income of US\$0.7 million in the prior year quarter. This quarter's one-off expenses from DMFI's plant closures and sale of Sager Creek were more than offset by the one-off gain worth US\$15.9 million pre-tax or US\$12.5 million post-tax from the additional purchase of US\$99.0 million of DMFI's second lien loan at a discount in the secondary market. Total loans bought back including the one from FY2018 amounted to US\$225 million out of the total US\$260 million.

Without the one-off items, the Group reported a recurring net loss of US\$3.7 million as compared to last year's recurring net income of US\$1.2 million.

The Group reduced its gearing to 2.5x equity as of 31 July 2018, from 3.0x in prior year period, primarily due to the US\$100 million Preference Shares issued by DMPL in December 2017 to raise equity and the purchase of DMFI loans at a discount in the past two quarters.

The Group's cash outflow from operations in the first quarter was US\$38.0 million, slightly higher than last year's US\$35.6 million mainly on lower other payables, partially offset by lower inventories.

Past the production peak in October, cash flows are expected to improve in the seasonally stronger second semester with peak sales around Thanksgiving and Christmas, as well as Easter in the last quarter ending April.

VARIANCE FROM PROSPECT STATEMENT

The Group expects to generate a net profit for the balance of the year on a recurring basis. It is on track to achieving a net profit for the full year on a recurring basis which is in line with earlier guidance.

BUSINESS OUTLOOK

DMFI faces headwinds due to shifts in consumer demographics, shifts in the way American consumers are eating and shopping, as well as shifts in consumer preferences. It will continue to build on its Del Monte brand heritage and will realign its business with those consumer trends over time. Its plan focuses on business segments which are on-trend and will rationalise non-profitable businesses, in particular the non-branded segment. It will continue

to optimise its cost structure and invest in a multiyear restructuring project for its operations and supply chain footprint to more efficiently support its commercial strategy.

With the four new joint ventures with Fresh Del Monte Produce Inc, DMFI has the potential to greatly extend the reach of the Del Monte brand to the growing store perimeter while allowing both companies to optimise economies of scale. Business plans are being finalised for the joint ventures in chilled juices, guacamole and avocado products, and retail food and beverage outlets, while business plans are being executed for prepared refrigerated fruit snacks.

The Group will continue to expand its existing branded business in Asia, through the Del Monte brand in the Philippines, where it is a dominant market leader. S&W, both packaged and fresh, will continue to gain more traction as it leverages its distribution expansion in Asia and the Middle East, while the Group's joint venture in India will continue to generate higher sales and maintain its positive EBITDA.

The Nice Fruit frozen pineapple plant is in operation, with trial shipments to key markets.

The Group will be exploring e-commerce opportunities for its range of products across markets.

Barring unforeseen circumstances, the Group is expected to be profitable for FY2019 on a recurring basis.

As part of the Group's deleveraging plan, subject to market conditions, DMPL plans to sell 20% of its stake in wholly-owned subsidiary Del Monte Philippines, Inc through a public offering on the Philippine Stock Exchange. The IPO was deferred due to volatile market conditions. The Company will announce as and when it relaunches this.

Reported under the Americas segment are sales and profit on sales in USA, Canada and Mexico. Majority of this segment's sales are principally sold under the Del Monte brand but also under the Contadina, S&W, College Inn and other brands. This segment also includes sales of private label food products. Sales in the Americas are distributed across the United States, in all channels serving retail markets, as well as to the US military, certain export markets, the foodservice industry and other food processors.

Sales in the Americas declined by 8.8% to US\$306.3 million driven by lower volume across categories most significantly branded tomatoes and private label sales as well as unfavourable impact of lower pricing in foodservice for pineapple juice concentrate. The decline in sales was in line with DMFI's strategy to deprioritise non-profitable businesses, including private label. The Company's thrust on innovation continued with the launch in June of *Del Monte Fruit & Oats*, a combination of healthy fruit and wholesome oats in a cup. With the Nice Fruit revolutionary technology, frozen pineapple, when thawed, has the same physical properties as fresh cut pineapple.

Continued investments in consumer advertising and insights are paying dividends as DMFI's market share in canned vegetables, canned fruit and fruit cup snack continue to grow.

DMFI generated lower gross profit and margin, impacted by increased cost to liquidate Sager Creek products, lower PJC pricing, and higher fixed cost per unit due to planned reduction in production volume in FY2018 to reduce inventory, in particular canned vegetable products, partly offset by lower trade spend.

Americas reported an operating loss for the quarter of US\$14.1 million versus prior year quarter's operating loss of US\$6.7 million due to incremental one-off expenses from the sale of Sager Creek residual inventory and closure of Plymouth plant which impacted operating margin. The one-off expenses amounted to US\$8.4 million pre-tax for the first quarter. Please refer to the last page of this MD&A for a schedule of the one-off expenses.

DMFI's first quarter is seasonally its weakest quarter accounting for only 19-21% of full year sales. As such, the first quarter is generally the least profitable quarter for DMFI.

Asia Pacific's sales in the first quarter decreased by 7.5% to US\$120.6 million from US\$130.3 million mainly due to decreased exports of processed pineapple products and unfavourable sales mix in the Philippines.
